

Oralogic Education Systems

Next Generation IT Education Systems

Introduction:

Due to change in social cultures and era of technology advancement, businesses need to be remaining update and decisive with ever changing dynamics of market. To meet these critical requirements, companies tried to control their core operating infrastructure through centralized software system commonly known as Enterprise Resource Plan ERP.

Companies try to implement best ERP solution in organization which meet and remain continuously update with change in local and global business policies and practices. The knowledge of ERP's is extremely important to work and manage modern business infrastructure for an individual. ERP experience plays important role to achieve best position in large and successful organization.

Oracle ERP solution is considers world's No.1 ERP which provides complete software solution for almost all departments or business function of any organization.

Administration of Oracle ERP is highly responsible task in organization. Companies usually have team of Oracle ERP administrators who manage and operate their software system to assure smooth functioning of organization. Oracle ERP Administration required Oracle OCP certification as pre-requisite. After completing Oracle OCP DBA track, candidate can easily attend the course. Linux skillset is essential for Oracle ERP suite. We add Basic Linux Admin course as complementary part of this training.

Oralogic Education Systems provide best education services for Oracle ERP courses. Our aim is to develop complete skill set with hands-on experience of our student to meet the industry requirements.
